

## Are you reaching your full phosphorus potential?

### Nutrient efficiency like no other.

Levesol is the only combination of nitrogen fertilizer and pure chelating agent you can mix with liquid fertilizer, taking in-furrow applications to a new level.

- 11% more available Phosphorus is equivalent to having an additional 120 pounds per acre of actual phosphorus.
- 9% more Zinc available - a critical nutrient in early plant growth.

13 BUSHEL ADVANTAGE

#### P Project Observations:

- Better early season growth.
- Better root development carried later into the season.
- Greater stalk diameter
- Thicker rind - better stalk strength.
- Two additional rounds around most ears.
- 13 bushel yield advantage.

Modern crops demand a lot of nutrition. But most can't utilize nutrients efficiently during early development. Levesol overcomes this.

Contact us today to take your in-furrow application to the next level.
